

# The Battle of Neighborhoods

## Best Borough to move as an Expat in London

Shiva Kumar LANKA

June 2020

### 1. Introduction

#### 1.1 Background

**London** is the **capital** and **largest city** of **England** and the **United Kingdom**. London has been a major settlement for two millennia. London is one of the world's most important **global** cities and has been called the world's most powerful, most desirable, most influential, most visited, most expensive, sustainable, most investment-friendly, and most-popular-for-work city. London also has largest **financial** institutions and is also home to **top-ranked** universities in the world. ([Wiki](#))

#### 1.2 Problem Description

London has always been a dream city for me personally to move and live there. To move to such a vibrant city, one of the main concerns is to find good affordable accommodation in a safe neighborhood. Therefore, in this project, I intend to explore London neighborhoods and find the best the neighborhood to move in. This project could potentially help other people who have similar interests to move to London and live there.

Through this project, I would like to get to know the safest borough (less crime rate as one of main factor) and its neighborhoods venues.

## 2. Data Description

To get the desired results, following data sources will be used.

1. London Recorded Crime ([Crime Data](#))(Last 24 months data is considered for evaluation)
2. List of London Boroughs ([List](#))
3. Foursquare APIs are used too explore neighborhoods and target different venues according to the presence of needed facilities. The data is stored in the data frame and used for visualization.

### 2.1 London Crime Data

Crime data recorded from past 24 months is used for analysis in this project. The data consists of 1566 records(rows) and 27 Columns.

Figure 2: List of Boroughs in London

The data source contains for each Borough in London, data on Population, its coordinates. Population can be used to calculate the Crime ratio and co-ordinates can be used to compute the latitude and longitude for each borough. These values are needed for Foursquare APIs to analyze the neighborhood data.

BoroughName	Population	Latitude	Longitude
Barking and Dagenham	194352	51.5607	0.1557

## 2.3 Foursquare APIs

Foursquare APIs are used to explore the venues in each of the neighborhoods of London. Data is obtained using the GET Request command from a URL source. The data obtained using these APIs looks as shown in below figure 4.

BoroughName	Borough Latitude	Borough Longitude	Venue	Venue Latitude	Venue Longitude	Venue Category

## 3. Analysis and Modeling

### 3.1 Exploring Crime Data

Crime data obtained from data source is post processed to remove anomalies. From the crime data, top five and bottom five boroughs with crime incidents are identified. These data are shown below in the two graphs.

Figure 5: Top 5 Boroughs with highest crime rates

Figure 6: Bottom 5 Borough with lowest crime rates

Westminster has highest crime rate (probably due to more touristic attractions in the Borough) followed by Southwark, Camden, Newham and Lambeth.

Kingston upon Thames is the Borough with lowest crime incident, by neglecting the airport areas as they are not usually considered for residential locations.

Number of crime incidents doesn't directly indicate the severity and impact of crimes in each borough as each has different area and population. We need to consider ratio of crime incidents to people. As seen from the population per each London borough, it is good assumption to calculate crime ration per 1000 people.

Figure 7: Monthly Average Crime ration per 1000 people

As seen from the above plot, **Westminster** has highest crime rate for every 1000 people (probably due to more touristic attractions in the Borough). **Richmond upon Thames** has lowest crime rate Ratio.

Different borough in London are shown in the plot below to get an overview of how big the city of London is.

### 3.3 Cluster Analysis

Using k-means clustering, boroughs are grouped based on venues present. This data is obtained using Foursquare APIs.

One hot encoding was performed to given binary values to each venue identified.

## 4. Results

In Section 3, we collected and analyzed the data for each borough to determine the safety and top venues for each borough. We need to combine both the analysis of crime rate and venues to make a final conclusion for best borough to move in as a expat.

### 4.1 Safety

For safety, normalizing the Crime to Population values. A borough with score of 1 is assumed the safest place or less crime ration for 1000 people

	BoroughName	CrimeToPopulation	Cluster Labels	Safety
0	Kingston upon Thames	24.885637	2	0.961917
1	Richmond upon Thames	21.708515	1	1.000000
2	Sutton	22.391628	2	0.991812
3	Merton	22.656966	0	0.988631
4	Harrow	22.205376	0	0.994044
5	Bexley	23.397638	2	0.979753
6	Havering	25.013081	2	0.960390
7	Barking and Dagenham	32.583920	0	0.869642
8	Hammersmith and Fulham	41.270952	1	0.765515
9	Kensington and Chelsea	48.614771	2	0.677488

Figure 12: Safety Score of Borough in London

As we see from the above table, **Richmond upon Thames** is safest place followed by **Sutton**.

### 4.2 Amenities

For best facilities, score based on personal preference are set in the data. For Ex: Highest score for Cluster 2 and lowest for Cluster 5.

	BoroughName	CrimeToPopulation	Cluster Labels	Safety	Amenities
0	Kingston upon Thames	24.885637	2.0	0.961917	1.0
1	Richmond upon Thames	21.708515	1.0	1.000000	0.9
2	Sutton	22.391628	2.0	0.991812	1.0
3	Merton	22.656966	0.8	0.988631	0.0
4	Harrow	22.205376	0.8	0.994044	0.0
5	Bexley	23.397638	2.0	0.979753	1.0
6	Havering	25.013081	2.0	0.960390	1.0
7	Barking and Dagenham	32.583920	0.8	0.869642	0.0
8	Hammersmith and Fulham	41.270952	1.0	0.765515	0.9
9	Kensington and Chelsea	48.614771	2.0	0.677488	1.0

Figure 13: Borough with top venues

### 4.3 Final selection of borough based on scores

**Sutton** is good borough to move considering the safety and amenities together followed by **Baxley** as seen in the table below.

	BoroughName	Safety	Amenities	Score
2	Sutton	0.991812	1.0	1.991812
5	Bexley	0.979753	1.0	1.979753

## 5. Conclusion

From the analysis done in the course of this project, best five boroughs in London are identified based on the safety and best venues in the neighborhood. These boroughs contain Pubs, Cafes, Restaurants and stores needed for good living and also mixing with local and international people in London.

However, as seen in the map, the above boroughs are a bit far from Central London. It would take considerable amount of time to commute towards central London (assuming the work place location). Moreover, we only considered venues which are popular and have reviews.

We could as well consider each borough individually and all the neighborhoods in each of borough to determine good location.
